

FOR THE RECORD

Arkansas founder ends county-judge bid, pivots to a worker-and-neighbor-owned robotics cooperative

Bentonville, AR — The founder of On It Robotics, LLC, stopped collecting signatures for the Benton County Judge race once the math against the incumbent political machine stopped making sense. The pivot: build the alternative directly instead of fighting the system that was pitched as the help.

On It Robotics is now the steward LLC behind a planned multi-stakeholder cooperative — **American Dream of the Future** — designed so the common humans who use the services hold the votes and the surplus. The model takes the private-equity playbook for robotic services and flips the cap table.

“I entered the race to give voters a choice. Now I'm giving the same people a choice to invest in themselves instead of Wall Street,” the founder said.

The Northwest Arkansas pilot focuses on robotic mowing, with adaptive reuse of vacated poultry barns as future solar, battery, and lithium-recovery sites. The endgame is *Urban Recovery Mining* of lithium, cobalt, and nickel from end-of-life packs the cooperative already operates — recovered material owned by members.

The parallel often cited inside the company: when Arkansas lithium reserves under the Smackover formation made national news, the headlines went to outside operators. The cooperative's answer is to keep the next round of resource value local — and structured so it stays that way.

On It Robotics is currently **pre-launch and documenting interest only**. No money is being collected. No securities are being offered. Any future cooperative membership or fleet-backed note will be made only through formal subscription documents after the required Arkansas and federal filings.

About On It Robotics

On It Robotics, LLC is an Arkansas-based steward company building the operating system for a planned multi-stakeholder cooperative called American Dream of the Future. The cooperative is designed so the people served hold the votes and the surplus. Same machine. No greed.
